**Subject:** Government Corruption

This evening I was watching a PBS program about allowing the major companies to control the television, and internet. I don't want you to give these major companies the complete control of communication. I believe the government is completely corrupt because the major corporations give money to each of the senate and house representatives for their election. Then they ask reps and senates to give these corporations whatever they want as well as President Bush. I am disgusted that the corporations control the government.

Simply, do not let the major corporations control the FCC control the internet, telephones, televisions and whatever else that you're voting on in the next three weeks.
